

What is a Personalised Learning Plan?

A Personalised Learning Plan (PLP) is used to provide information and strategies relating to adjustments for students with disabilities or learning support requirements.

How have you determined my child needs a PLP?

Students who are identified as requiring additional support and monitoring within their classroom, or who meet the criteria under the Disability Act will have a PLP to support their academic and/or social development within school.

Why would a PLP be of benefit to my child?

For a student to achieve success with their education, it is important that they are provided with the tools required for that success. PLPs ensure students are given appropriate support and adjustments in relation to their areas of difficulty.

How will this change my child's education?

Teachers plan their teaching and learning to cater for the needs of all students. The development of a PLP allows teachers to see the strategies and adjustments necessary for each student.

Will this be a permanent change in my child's education?

PLPs are reviewed throughout the school year. It may be determined that the document requires changes or the student no longer requires a PLP.
