Technology Faculty...It’s all about Industrial Technology & Design

A lot has been happening in the Technology Faculty this term. Our Year 11 and 12 Building and Construction students have designed and built a shade structure between the Science and Industrial Technology buildings which has been popular as an eating and social retreat amongst Victoria Point SHS students on a daily basis.

Also of note is the Community Project between Victoria Point SHS and Bayview SS where the Year 10 Manufacturing and Year 12 Industrial Technology Skills students have been designing and constructing play equipment for use by the Bayview SS Prep and Special Education students.

Year 12 student, Lakin Brown with a few of the products designed so far.

Year 10 students in the process of making a picnic table.
